

Autumn Leaf Trail

An autumn walk in Havering Park is enlivened by so many leaves of assorted colours and shapes. Pictures of some of the leaves found there are below. If you have a moment, why not identify what type of tree or plant they belong to? When you next go on an autumn walk, you can look out for similar leaves and other new, different ones...

The names of the trees and plants are written in green, but which name goes with which picture?

beech downy birch
fern field maple hawthorn
pedunculate oak sessile oak
silver birch
sycamore sweet chestnut
